

Labs 4-1 – MacOSXMinikube 安装

安装 homebrew (<https://brew.sh/>) 命令: `/usr/bin/ruby -e "$(curl -fsSL https://raw.githubusercontent.com/Homebrew/install/master/install)"`

安装 minikube: `brew cask install minikube`

安装 virtualbox (<https://www.virtualbox.org/wiki/Downloads>)

安装后, 执行 `minikube start`, 将会下载镜像并启动 1 个 virtualBox 虚拟机, 启动后下载 localkube, 包含 Kubernetes 和 Docker

验证: `kubectl get nodes`
